

STEEL

INTRODUCTION

We are a specialized supplier in steel design and manufacturing, with over 15 years of experience delivering high-quality solutions to national and international clients.

AGN-STEEL specializes in industry-leading cutting, bending, welding, machining, powder painting and assembly processes to create the best racks solutions for your application. Low-volume prototypes and high-volume projects. We have specialized cells which allow us to achieve better delivery time and better costs for your supply chain.

PROCESSES

LASER CUT

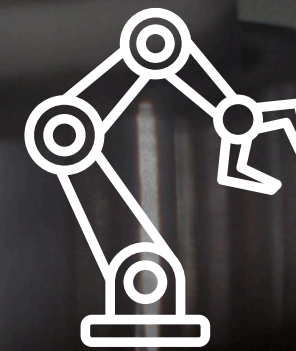

WELDING

MACHINING

BENDING

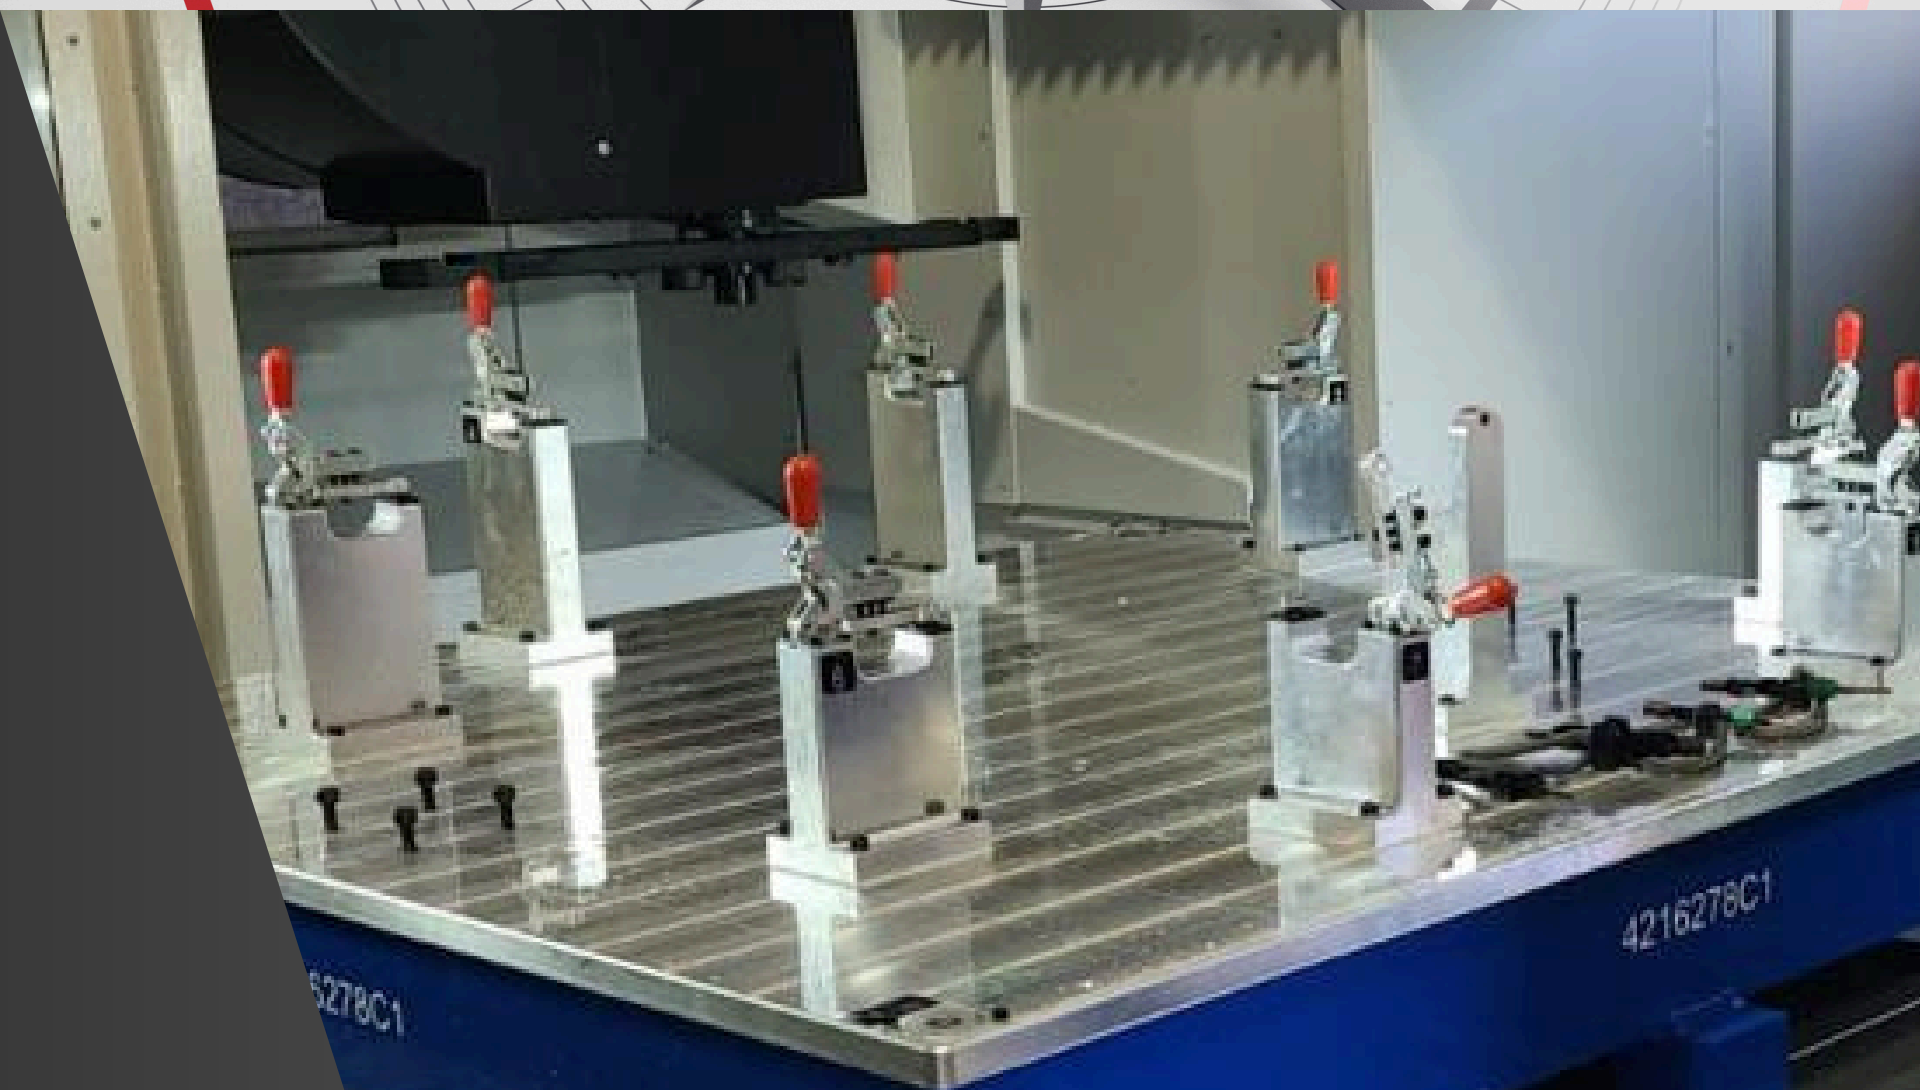

ASSEMBLY

All our products are designed and analyzed with the latest software technology. We also guarantee the structural strength of our products using the finite element analysis (FEA).

Vision.
To be a leading
company in its field at
the forefront and with
the best quality.

PROCESS:

DESIGN-PROTOTYPE-VALIDATION.

MANUFACTURING EQUIPMENT:

- CNC Turning chuck size 12",8",6"
- CNC Milling vf-5/50.50x26x25. Okuma 30x20x18.
- Drilling
- Saw
- Hydraulic Guillotine Share up to 1/2" thickness
- Mechanic & Hydraulic Press up to 200 Tons
- Hydraulic Press Brake up to 400 tons
- Tube laser cutting up to 200mm
- Laser Cutting up to ¾ " Mid Steel
- Tube bending machine
- FARO Arm
- Welding. MIG & TIG (SMAW, FCAW)
- Assembly

FINISHES.
Powder coating
Galvanized
Spray Painting
